Lee Weishar Re-Elected to National Board

Lee Weishar, Ph.D., PWS was re-elected to the board of directors of the American Shore and Beach Preservation Association (ASBPA) at its recent annual meeting and fall conference on St. Pete Beach in Florida. He joins 36 other members of the association's board, who share a broad range of coastal industry experience.

A senior scientist with the Woods Hole Group since 1989, Weishar has more than 30 years experience in the fields of oceanography, coastal engineering, sediment transport, ecological restoration, environmental impact assessment, and project/program management. Prior to joining the Woods Hole Group, he was employed by the USACE Waterways Experiment Station (now ERDC). Weishar specializes in coastal engineering and wetland/marsh restoration and the integration of biological, ecological, and hydraulic data into wetland restoration designs to ensure that the design will meet the restoration objectives.

"We are very pleased to keep Lee Weishar on our board," said ASBPA President and Caswell Beach Mayor Harry Simmons. "His experience and effectiveness are an excellent fit for the ASBPA, which is dedicated to preserving, protecting and enhancing the beaches, shores and other coastal resources of America."
