

Date: April 2021

POSITION: Coastal Scientist/Project Lead

ROLE: Client-oriented member of Coastal Sciences & Planning Team focused on supporting permitting activities and managing shore protection, climate resilience, and coastal restoration projects. Assist in delivering high quality, on-time, and cost-effective work products. Interface directly with clients, lead project teams, and help develop new business opportunities.

DUTIES AND RESPONSIBILITIES: The Coastal Scientist/Project Lead will have the following duties and responsibilities:

- Leadership and contributions to projects in the coastal zone relating to:
 - Shoreline evolution and management
 - Hazard mitigation
 - Climate resilience planning
 - Dredging and sediment management
 - Floodplain Management
- Permitting of coastal projects
- Field assessment of coastal resource areas
- Perform consulting and project management tasks
- Report writing and review
- Develop and maintain client relationships
- Proposal preparation, business development, and external marketing

SUPERVISION EXERCISED

Depending on experience level may include mentoring of junior level staff.

SUPERVISION RECEIVED

From Team Leader.

PERFORMANCE EVALUATION: Performance evaluation will be based on:

- Ability to conduct project work as defined in job description, and achievement of defined goals
- Quality of work products and project deliverables
- Effectiveness of project management
- Ability to communicate through report writing and oral presentation
- Interaction and coordination with other team members
- Ability to contribute to new business opportunities

QUALIFICATIONS: 2-5 years of related experience. Master's Degree in coastal science or related field is required. Background in coastal processes and coastal management activities. Experience with state and local regulations for coastal projects, management of field activities, assessment of environmental impacts, alternatives analysis, and related tasks for carrying projects through the permitting process. Experience with software including MS Word, Excel, and PowerPoint. Excellent English oral communication, technical writing, interpersonal, and teamwork skills are required, along with proof of eligibility for employment in the United States.
